Preliminaires

Are basic verification ok ?

- Is everybody present?
- Only grade the work that is in the student or group's GiT repository.
- Chrome must be used for this defence.

If there is nothing in the repository put 0 and stop evaluation.
Discuss what went wrong (not necesseraly on the technical side) and how to avoid same situalion tomorrow.

         ✓ Yes   ✕ No

Exo00 - Basics or home

Let's test exercise 00.

Are all required elements present?

- Is the backgroup pink? FFC0CB (or in decimal as you wish..) - Is the tab's title Basics? - There is a title in white, visibly bigger, centered with at least 1 special character. - 2 images side by side represent online shops. - A link under each image, not a link between the 2 images goes to the online shop's website when clicked on. - A horizontal line. - The copyright is under the line on the right and in italic with login, the year and using the monospace font
Click on No if one element is missing. A tolerance will be applied if and only if one of those point at most isn't completely correct but nothing can be missing. If it's No, defence stops here.

⊘ Yes   ✕ No

Exo01 Mendeleïev

Does Dimitri seem happy?

The array

Does the array looks like what was asked? - The array (with or without lanthanides accepted: at least 7x18, the extra 2 lines with pleasure) is readable. - It's not an image of an array, it's proper HTML/CSS: modify one element in the source and check that the update is made when refreshing the browser. - There are colors and an image for decoration. - Each cell of the array contains the symbol in big, the number and the atomic weight are respectively in the lower left and top right corners..
If it's not beautiful but technically what's expected of cours it's all right. If it doesn't fit the description, evaluation stops here.

⊘ Yes   ✕ No

Exo 02 Day of the 42

Ou en est votre interface de jeu ?

Checkup list

There are a lot of things to check in this execise: - The use of only the images given as resources (not one more not one less). - At least the 10 alt/titles asked for (2 at the top, the 5 actions, the 3 objects). If there is more it's ok (for example on the central image area). - Both active zones on the central image. - The 4 links are present. - The gray used is a match. - Rounded cornes on each 5 zones. - The shadows on the 5 zones. - The image's positions. - The entry zone text and button. - A magnifying glass overflows a little. - The green text zone covers the central image. - The siz and font family of each text part (the text goes on a newline on the same word without font family: serif/sans/fixed). - A red shadow under part of the text.
A tolerance will be applied of 3 problems on the 13 points will be granted. If there is more than 3 problems, the evaluation stops here.

⊘ Yes   ✕ No

Exo 03 The shrunk agent

Responsive design

Bonus

It's smooth with a wow effect.

⊘ Yes   ✕ No

Responsive design

Display the page. Change the size of the browzer from big to small and from small to big. The array's size as well as the font must change at least once in both case.
If it's smooth it's worth a bonus point (see next question). If it's rough (text overflows into another cell, there is only 2 sizes where more could do) it's alright. If only the array changes and not the font, of the opposite (even if both are related) or no update at all, the evaluation stops here

⊘ Yes   ✕ No

Exo 04 SNCF Sandwich

The dropdown menu remember?

The is a dropdown menu?

The drowdown menu concept is that there is a main choice visible (with one or more elements). When you click on any visible defaut elements, a list appear with several items available.
Just 1 root element with just one new element in the list doesn't do. Doesn't look like a dropdown menu at all. There must be several, with lots of elements and levels (you can go down 3/4 times).
If there is no dropdown menu, of if it was made with anything else than HTML and CSS the evaluation stops here.

⊘ Yes   ✕ No

Exo 05 SCUMM

Script Creation Utility for Maniac Mansion That's for those of you that checked on wikipedia.

Un playable game?

For the game to be considered playable, there must be a beginning of a scenario, with several places, objects, interactions with the environment and with people.
We start somewhere, have an objective and it's possible to achieve it.

- A game close to playable with a crap scenario with all possible actions is ok.
- Everything else is bonus.

⊘ Yes   ✕ No

Bonus

The game rocks! Awesome gameplay, cool design and images, a lot of objects and interaction with plenty of people...

Rate it from 0 (failed) through 5 (excellent)
